The 1971 Boiling Pot is dedicated to Dr. Weimer Hicks who served as president of Kalamazoo College from 1954 to 1971.
anchored storms
with crews in town
for the blast
pace the parallels
that circle
the earth
more evenly than twice
assembled
and spyglass jokes
and legs to spill
on sails
and fill stories
with waves that have
swung
half the heroes
whoever built a
catt
and lost the morning
to a high tide
that
didn’t come down
until boxes
burned
from peering
of ovens
open on meals dragged
from the lads
and holds
of the enemy

BEER

I think that I shall never hear
A poem lovelier than beer.
The brew that Joe's Bar has on tap,
With golden base and snowy cap.
The foamy stuff I drink all day
Until my mem’ry melts away.
Poems are made by fools, I fear,
But only Schlitz can make a beer.

The symbols below are the language of the "art" of Alchemy. While the practice of Alchemy itself has disappeared, its influence remains enduring.

- To solve
- To sublime
- To take
- To purify
- Summer
- Autumn
- Winter
- Spring

It is probable that these notations influenced the development of modern chemical abbreviations used throughout the world. The following symbol is another whose influence has reached around the world. A symbol of the health of mankind.

---

**PLANNED PARENTHOOD**

OVERPOPULATION can happen in a country - in a city slum - or in a single family. Wherever it can cause frustration, poverty, dependence and despair.

Planned Parenthood believes that every child has the right to be born wanted, into a home where parents are ready emotionally, physically, and financially to welcome him; that parenthood should be a privilege, not something that "just happens", that every woman should have access to medically approved family planning care.

SOME FACTS ABOUT PLANNED PARENTHOOD OF KALAMAZOO COUNTY:

- Planned Parenthood maintains medically staffed family planning clinics in three locations in Kalamazoo County.
- Since April, 1967, over 2900 women have received family planning information and services in our clinics.
- An average of 25 new patients are enrolled each week.
- Patient visits are by appointment only.

SERVICES IN THE CLINICS:

- Contraceptive information and supplies
- Pelvic exam, blood pressure check, and weight check every six months
- Pap smear and breast exam annually
- VD screening offered with exam

OTHER CLINIC SERVICES: pregnancy tests; pre-marital exam and blood work for women; infertility information, counseling and referral; sterilization information, counseling and referral; and assistance in referrals for other health and social problems.

EDUCATIONAL SERVICES:

One of the agency's major goals is to alert the American people to the nature and consequences of the population problem and to educate Americans to the advantages, both personal and social, of small families.

Information is presented through workshops, community programs, newspapers, journals, radio, T.V., posters, films, exhibits, literature give-away, and personal contacts.

Library materials are available for research on Planned Parenthood, population and family planning.

You don't go "burning up" all the miles, and you have nothing to raise concern, too. You've done your side and low mileage would almost do the engine no. But look at your oil and fuel filters, if made possible by products of combustion, always have a thin or another, after starting. These "remain" won't all get out. They contain acids in more of a metallic state.

Acids in your engine are nothing new, but they couldn't do their work when their building was interrupted by frequent use of your car and fast driving. But now acids often stay in your inactive engine for days. And the short drive may just generally make new, don't help much to thicken's miles out. So sure when you've not even run that you could get any needed replacement parts, avoid even you consider engine performance as hurriedly as employing your engine's inside-oil-relines.

You know why about any going in... to make such repairs if not... for instance. And to make and remain, have your engine oil-relined—quickly—simply—economically—by changing the filter to Conoco Nth motor oil... all that oil-stains.

Conoco Nth—economized—includes a great advancement in technology. This motor oil is to maintain oil-detergents and other elements at the proper concentration to remove dirt in small hours or slugs when such residues against and can help. Your spring oil change is a "must," but the work and effort are not... so sure when you get Conoco Nth. Continental Oil Company

ACID—not speed—may "burn up" your engine now!

It's not speed: it's the residue in your engine—"burn up" or "burn out"...
When buying a Diamond...

What is meant by "Clarity"?

In diamond, clarity refers to the presence or absence of flaws and blemishes. A diamond can be termed "flawless" only when no flaws are visible to the unaided eye under 100 times magnification.

There is a "common sense" way to select your diamond—only on the facts. Let us show you the overall picture of diamond value and quality. Take advantage of our vast gemological knowledge and experience. You'll find this is the wise way to select the diamond you'll be proud to give or own.

Paul C. Morrison

MEMBER AMERICAN JEW SOCIETY

AND TRUST COMPANY OF MCCONNICA

What is meant by "color"?

When you find crystal-clear, intense colors in any diamond it is usually of the finest quality. This is internal color, not the flares of rainbow colors called "fire." Generally, the closer the diamond approaches the absolute absence of any color, the higher it is evaluated.

What is meant by "cutting"?

Cutting is a great art. Because a diamond is such a small piece, it is very difficult to cut it properly. But a great deal of skill and care can be used to cut a diamond properly and make it glow like a star. With a masterful touch, the diamond will be cut to reveal the maximum amount of brilliancy and fire. The best cutting technique is the one which will give the best value for the finished diamond.

NO CHANGE IN TASTE!

FRESH—COOL—HUMID... that's the way apples are—and that's the way apple "honey" helps keep your Old Gold cigarettes fresh.

Yes—we've found a new way—a natural way—to protect the freshness and flavor of the fine Old Gold blend.

It all started when an apple concentrate was created... a nectar, golden nectar from the pure juice of fresh apples. This proved to be especially good for protecting the moisture and freshness of tobacco.

Apple "honey" we labeled it—and we're using it now to protect Old Gold freshness. By bathing the choice Old Gold blend in this rich apple "honey," we seal in the flavor and moisture—help keep Old Golds deliciously fresh.

Get a pack soon—and enjoy Old Gold freshness.

P. Lorillard Company—Established 1760

*New moisture-protection agent we call Apple "Honey," developed by U.S. Department of Agriculture

Mrs. Jack Sims Says It Was Hard To Keep Raid Secret, but She Did

DISTRICT — Mrs. June Sims, wife of Michigan's Capt. Jack Sims, one of the Tokyo raiders, confided in an interview today. Not being able to tell the few fellows who had been on the raid, and their answers were really anything. One thing that continued to amaze them was the complete silence and not even the family had any idea the planes had gone over the island. She re-counted how Jack brought back with him, until this week.

An attractive blonde, Mrs. Sims has just returned from Florida —Continued on Page 2, Column 25.
Our sincere apology is extended to Louise Freyburger-English whose senior picture was lost in the confusion.
