The Faculty

ARTHUR GAYLORD SLOCUM, LL. D.,
President, and Professor of Mental and Moral Philosophy.
117 Woodward Avenue.

SAMUEL BROOKS, D. D.,
Emeritus Charles Willard Professor of the Latin Language and Literature.
710 West Lowell Street.

STILLMAN GEORGE JENKS, B. S.,
Professor of Chemistry and Physics.
1555 West Main Street.

CLARKE BENEDICT WILLIAMS, A. M.,
Olney Professor of Mathematics.
516 West South Street.

HERBERT LEE STETSON, D. D., LL. D.,
Professor of Psychology and Pedagogy.
926 West Kalamazoo Avenue.

GEORGE ABNER WILLIAMS, Ph. D.,
Broadsus Professor of the Greek Language and Literature.
136 Thompson Street.

ELIAS JOHN MACEWAN, A. M.,
Professor of the English Language and Literature.
314 Elm Street.

WILLIAM EMILIUS PRAEGER, M. S.,
Professor of Biology and Geology.
618 Summer Street.
The purpose of Kalamazoo College is to enable young men and women to discover their capacities, to train their intellects for strong and vigorous thinking, to gather valuable information from science, literature, history, and other departments for use in later life, to lay a substantial foundation for professional and technical study, to gain a broad and generous culture, and to develop nobility of character and power to achieve moral victories. The curriculum is arranged with reference to accomplishing these results.

Certain subjects are required in all courses, but there is still large opportunity for elective work. The faculty has been selected not alone with reference to knowledge and skill in imparting information, but with due regard to personal qualities and the ability to mould character. The great majority of the students have an earnest purpose to secure a liberal education in order to be of larger service, and this fact gives tone to the institution. The personal contact with members of the faculty aids greatly in the development of the nobler qualities, and the student organizations cultivate a spirit of helpfulness which is exceedingly valuable.

Seventeen states and countries, and seventy-five
high schools, are represented by one or more students, but the College is not lacking in local support, as there are more than thirty graduates of the Kalamazoo high school now in attendance. Through the generosity of the friends of the College, a fund has been provided for assisting to a limited extent students of high character and scholarship who are dependent upon themselves for securing an education.

Every young man or woman who desires to be of the largest possible service in the world should seek to secure a college education. Training is power. The trained man has every advantage over the untaught. The College will call forth latent forces, it will stimulate intense activity, it will develop power to solve the difficult problems of life, it will give culture, it will test and strengthen the character. The leaders in every walk of life are coming more and more from college halls. If you wish to be a leader, get ready for leadership. Test your strength with the bright young men and women in college. You will discover your elements of weakness and of power. Nowhere can time and money be invested to better advantage than in securing a liberal education. It is the path to larger enjoyment, richer culture and nobler service.

Admission of Candidates for the Bachelor's Degree

Candidates for admission to the various courses of study leading to the Bachelor's degree are admitted to the College either (1) by certificate or (2) by examination. A statement of the kind and amount of work required is given below.

1. Graduates of high schools approved by the Faculty may be admitted to the Freshman class, in the course for which they are prepared, on the presentation of satisfactory certificates* of work done, and of recommendations for admittance from the high-school authorities. These certificates will be accepted only in so far as they give detailed statements of the extent and grade of preparatory work; and, without special faculty action, only when presented within one year and four months after the time of graduation. A statement of the entrance requirements will be found on pages 11 and 12.

The list of approved schools includes all schools approved by the University of Michigan, all schools affiliated or co-operating with The University of Chicago, and certain other schools.

* Those who intend to enter the College can obtain the proper blank forms for these certificates from Prof. S. G. Jenks, Secretary of the Faculty.
2. Entrance examinations will be held in Bowen Hall at 9 A.M., Sept. 18, 1906. Satisfactory examinations must be passed in the subjects mentioned below.

Entrance Requirements

A unit is defined as a course of study pursued through one school year with four or five prepared class exercises a week; one and one-half or two hours of laboratory work in science is equivalent to one prepared class exercise.

All candidates for degrees must present fifteen units.

The ten units of Group I are required of all.

**GROUP I.**

English, 3 units.
Mathematics, 3 units, including solid geometry.
Foreign language, 2 units.
Physics, 1 unit.
History, 1 unit.

Five additional units must be selected from Group II.

Candidates for A. B. or Ph. B. degrees must select 4 units of Latin in addition to the foreign language requirement of Group I.

**GROUP II.**

Greek, 2 or 3 units.
Latin, 2, 3, or 4 units.
German, 2 or 3 units.
French, 2 or 3 units.

History, 1 or 2 units.

or,

History and Civics, 1 unit, and History 1 unit.
Physiography, ½ or 1 unit.
Physiology, ½ or 1 unit.
Botany, ½ or 1 unit.
Zoology, ½ or 1 unit.
Chemistry, 1 unit.
Trigonometry, ½ unit.

Not more than three units of Science from Group II may be offered.

All students are advised to present two units of Latin, and students who expect to enter professional schools (theology, law, medicine) after finishing the college course should certainly do so, as at least this amount of Latin is required for entrance to the better professional schools.

Candidates for the A. B. degree are advised to present two or three units of Greek, and candidates for the B. S. degree a like amount of French or German. If this is not done, the amount of elective work in college is greatly diminished.

**Special Students**

In general, students desiring to pursue special courses of study must be prepared to enter one of the regular courses. Under exceptional circumstances, the Faculty may grant permission to take up special work without regular preparation for college entrance, but in such cases the student must be of suitable age, and must present satisfactory
evidence of his ability to do this special work. If such a student afterward desires to become a candidate for a degree, he must comply with the regular college entrance requirements. This must be done before the student begins the work of the Senior year.

**News Items**

Mr. Robert Gordon, of the Junior Class, was given first place in the ninth annual contest of the Michigan Oratorical League. Representatives of the following colleges delivered orations: Adrian, Albion, Alma, Hillsdale, Hope, Kalamazoo, Michigan Agricultural College, Michigan Normal College, and Olivet. Mr. Gordon represented the State in the inter-state oratorical contest held at Topeka, Kansas.

Mr. John Henry Carstens was given second place in the intercollegiate prohibition oratorical contest held at Albion.

During the past few months President Slocum has delivered a large number of public addresses on various subjects in Kalamazoo and in other parts of the State.

During the winter a lecture course open to students and friends of the College has been conducted. The speakers and subjects were as follows: Professor Praeger, "Bird Migration." Professor Worden, "Schiller, the Man and the Poet." Professor G. A. Williams, "Athens, Old and New." Professor MacEwan, "Burns." Professor Stetson, "Feeling Good and Feeling Bad."

Members of the Faculty have spoken at various times during the winter before the Ladies' Library Club, the Twentieth Century Club, and the Civic Improvement League of Kalamazoo. Professor MacEwan has spoken on Hamlet, English History in King John, and Shakespeare's Heroines. Miss Johnson read a paper on Richard III. Professor G. A. Williams gave a travel talk on Greece. Professor Stetson presented papers on sociological subjects.

A lecture course conducted by the pastor of the Baptist church at Galesburg included the following numbers from the College: Professor Stetson, "Feeling Good and Feeling Bad." "Professor Worden, "The Paris Exposition of 1900." Professor Praeger, "A Year with the Birds."

Before the Women's Union of the First Baptist church Professor G. A. Williams gave a travel talk on Greece, and Professor Praeger a talk on Ireland.

Professor Praeger addressed the Unity Club of the People's Church on "Minute Enemies of Plants."

Professor Stetson gave the address at the rededication of the Baptist church at Dowagiac.

The Faculty was represented at the Michigan Schoolmaster's Club by Professors C. B. Williams, Praeger, and Worden.
Professor Williams gave a report as chairman of a committee, on the organization of a Michigan Mathematical Society, and was elected chairman of the Mathematical Conference of the Schoolmaster's Club for the ensuing year.

Professor Worden read a paper on "Some Indispensable Factors for Americans Teaching Foreign Language and Literature."

At the County Teachers' Institute Professor Praeger delivered two addresses: "Our Common Birds," and "Nature Study."

Professor Worden lectured under the auspices of the Woman's Auxiliary of the Kalamazoo Hospital Association on "Oberammergau and Its 1900 Passion Play."

Lemuel Call Barnes, '75, of Worcester, Mass., will deliver the Baccalaureate Sermon.

Senior Class
Graduating June 20, 1906

A. Candidate for degree of Bachelor of Arts (A. B.)
Ph. Candidate for degree of Bachelor of Philosophy (Ph. B.)
S. Candidate for degree of Bachelor of Science (B. S.)

A. GAYLORD SLOCUM, LL.D.
PRESIDENT
KALAMAZOO, MICHIGAN
A Message

To all young men and women who are seeking to make themselves efficient in their life's work: You need a sound body, a vigorous and well disciplined mind and a strong moral character. To aid you in securing these results is the mission of Kalamazoo College.

Kalamazoo, Michigan, is an exceptionally beautiful and prosperous city of 30,000 inhabitants. Five lines of railroads, passing through it, make the city easily accessible from all directions. The College is situated in the western part of the city on a hill, covered by a fine grove of native hardwood trees. This location combines the quiet and beauty of the country and the refinements and enterprise of a growing city, whose citizens to an unusual extent are themselves the representatives of the best culture.

The College is equipped for its work as follows:

1. Four good, brick buildings. One of them (Bowen Hall) was recently erected and is in every respect one of the most complete and best arranged college buildings in the state.
2. Three laboratories: chemical, physical and biological, which are supplied with apparatus necessary for thorough experimental work by the students.
3. Library of 12,000 volumes, which enables the
students to investigate the various subjects treated in the several classes. The Public Library of the city, which contains over 35,000 volumes, is also available to the students of the College without expense to them.

The corps of instructors consists of men and women of broad culture and successful experience in teaching. They represent several of the best institutions of this country and Europe, and understand the best pedagogical theories and practices.

There are three different courses of study, leading to the degrees of A.B., Ph. B. and B. S. In each of them nearly one-half of the total amount of work required for graduation.

Students whose work is approved by the University of Chicago receive credit on its records and can secure its degrees by completing twelve weeks work at the University. Three fellowships are also offered annually to members of the graduating class, which enable them to pursue graduate work at the University without the payment of tuition.

Students, who take the work offered in Pedagogy, receive, at their graduation, a State Teacher's Certificate from the Michigan Board of Education, which authorizes the holder to teach in any public school in this state for four years without examination, and at the end of three years of successful experience in teaching, may be exchanged for a Life Certificate.

A limited number of Scholarships have been established to help students who are partly or entirely dependent upon themselves for securing an education. This aid, given to supplement the efforts of the students, is often sufficient to enable them to complete their college course, when otherwise they would fail.

Both young men and women often find opportunities (for there are many in a city of this size) to earn a part of their expenses while in college. Students of courage and industry and good habits, who are willing to work, seldom fail for lack of means to gain a college education.

The expenses at Kalamazoo College are low, when the many advantages are considered. $200 per year will cover all necessary expenses for tuition, room rent, board and books for the school year.

A healthful interest in athletic sports is encouraged by the Faculty. There have been provided fine tennis courts, a baseball diamond and an athletic field.

There are several societies very successfully supported by the students and members of the Faculty. They are:

1. Five literary societies which hold weekly meetings.
2. Two Christian Associations which meet once a week.
3. An Oratorical Association which has for its object the promotion of interest in oratory and debating.
It sends, each year, a representative to the Michigan Oratorical League.

4. The Prohibition League which annually sends its representative to the State Contest.

5. The Athletic Association as a branch of the Michigan Inter-Collegiate Athletic Association.

6. The Brooks Classical Club which seeks to develop interest in classical study.

These various organizations furnish the students with many excellent opportunities for personal training in different lines of very important practical work.

The spirit which prevails throughout the institution is helpful and inspiring and contributes largely to the happiness and success of the students. They are recognized for what they are in themselves. No one occupies an inferior place because he is compelled to rely upon his own exertions to get his education. What he is able to do, and his own individual worth are the factors which determine the position which every student holds in the College.

During the past year there have been representatives in the College from seventeen different states and countries, and also from seventy-five high schools and academies.

The College year is divided into three quarters of twelve weeks each. The several quarters for this current year will open as follows: Fall, September 18; Winter, December 14; Spring, March 26.
An Open Letter

To the Friends of Kalamazoo College

You are doubtless aware from reports already received that Kalamazoo College has a good attendance this year, and that the outlook is exceedingly encouraging. The students come from thirteen states and countries, and about eighty high schools or other preparatory schools are represented. The local support is indicated by the fact that there are in attendance this year thirty-seven graduates of the Kalamazoo High School, thirteen of them having entered this year.

I believe there is a growing feeling that Kalamazoo College is doing the kind of work that may reasonably be expected of such an institution, and the number of its friends is constantly increasing. With the hope that more complete information may extend the interest in the work we are doing, I will indicate briefly in the following paragraphs our present condition and our most pressing needs.

LOCATION

Kalamazoo College has an admirable situation for a successful twentieth-century educational institution. It is generally conceded now-a-days that better and more efficient educational work is being done in the city than in the country. Faculty and
students alike, are stimulated by constant contact with busy and successful men of affairs. Laziness is out of place, and ambition is fired. Students who have to support themselves are able to find well-paid work in the city, so that greater opportunities are offered to rich and poor alike.

Kalamazoo is widely known as a prosperous manufacturing and business town. Its population is now over thirty thousand and is rapidly increasing. The importance of the city as a railroad center is made clear by the fact that four lines, including the Michigan Central and Grand Rapids and Indiana railroads pass through, and three others have terminals in the city. These railroads make the College the center of an unusually large tributary territory. It is the only college in this prosperous and thickly settled part of the State.

FACULTY

All the members of the College faculty have had special preparation and successful experience. They are in hearty sympathy with the aims of the institution, and are familiar with modern methods. They believe that character-building is of supreme importance, and that all departments of knowledge should contribute to this end, and yet they do not neglect the practical side of life. They believe that young men and women should be trained for efficient service, that they should have high aims, and should know how to accomplish definite results. They are endeavoring to develop strong manhood and womanhood, to present high ideals, and to train for efficient service.

ENDOWMENT

The permanence of an institution depends upon the principles upon which it is founded and its financial support.

State institutions are generously cared for by direct tax. The Christian colleges must rely upon voluntary support. Tuition is necessarily low, and the income from this source meets only about one-fourth of the expense of maintaining the College. The number of students in Kalamazoo College is steadily growing, and this growth makes necessary a constant increase in the income from other sources than tuition. At present rates of interest a large endowment is necessary to secure even a moderate income, and the amount of income determines the size of the faculty, the number of courses offered, the scientific equipment, and library facilities.

The total expenditure for general purposes, salaries of faculty, the treasurer, and steward, wages of janitors, annuities, insurance, fuel, light, and water, printing and postage, improvements on buildings and grounds, and miscellaneous expenses during 1905-1906, was $26,458.25. In comparison with other institutions doing similar work, this amount is exceedingly small, and it was kept within this limit only by the practice of the strictest economy at every point, and often at the expense of increased efficiency. We must have more endowment or fail to meet the moral obligation resting upon us to give to the increasing number of college students, many of whom come from a great distance, the training which will fit them for the
largest usefulness, and enable them to meet the fierce competition in every department of business effort.

Many of our students are making heroic efforts to secure a liberal education, and they are entitled to the best that can be afforded. Increased income will provide for more courses and better equipment.

While there are many encouraging features at the present time in the work, yet we are greatly hampered by lack of funds. At least one hundred thousand dollars should be secured at once. The present effort is to raise fifty thousand dollars of this amount before July 1, 1907, payment to be made July 1, 1907, 1908, 1909. The increased income from this endowment would mean a forward movement in several departments.

**LIBRARY**

With modern methods of teaching, the library has become an essential feature of every college, and the student needs to be brought into touch with the best that has been written on all important subjects.

Kalamazoo College is fortunate in having a loyal friend in the person of Mr. F. R. Welles, of Paris, France, who has contributed generously for thirteen years to the library fund, and through whose generosity several hundred books are added each year. There is also some income from the Edward Olney Fund. These two sources, however, are not sufficient for our ever-increasing needs.

The card catalogue system is in use in the library, and thus students are able to find readily the desired information.

The room set apart for the library in Bowen Hall is already nearly full, and an effort must be made in the near future to secure a library building. Perhaps the one who reads this Bulletin may be disposed to erect a Memorial Library. Such a gift would be a permanent contribution to Christian education.

**GYMNASYIUM**

Physical training is coming to occupy an important place in modern education, and Kalamazoo College ought to have a well-equipped gymnasium and a competent instructor. Other institutions are far in advance of us in this respect, and there is a growing demand for adequate facilities for physical culture. The field for out-of-door exercise is being put into excellent condition, and with the addition of a gymnasium the means for physical training will be satisfactory.

**LADIES’ HALL**

The Ladies’ Hall furnishes a pleasant home for the young ladies during their college course, but it is not large enough to meet the present need. Several who applied for rooms this year could not be accommodated. An addition ought to be made to the hall at once so that it will accommodate at least twenty more students. This would add to the attendance at the College, and the cost of maintenance would not be greatly increased.
OBSERVATORY

The College needs an astronomical observatory. A small but substantial building, containing a permanently mounted equatorial telescope, a meridian circle, and the other necessary instruments can be built for six or eight thousand dollars, and would add greatly to the value and efficiency of our work. Such an equipment would not only enable us to offer more and more valuable courses in astronomy, but would give all the students an opportunity to see for themselves some of the wonders of the heavens.

MUSIC AND ART

The aim has been within recent years to place all the emphasis on the literary and scientific work in the College Department, but the time has come when some attention may properly be given to music and art.

Kalamazoo is admirably located for this kind of work, and there would undoubtedly be a large amount of patronage from the city in addition to the students who would come from other cities and towns of the state. Besides, many students doing literary work wish to continue the study of music or take up work in art.

As soon as funds are provided for an up-to-date building devoted entirely to music and art, the Board of Trustees will consider the matter of establishing such a department.

While it is hoped that these needed buildings may be secured in the near future, and gifts for them would be greatly appreciated, the present appeal is for assistance in securing increased endowment. This is an opportunity for the friends of the College to show their loyalty to the institution. The progress which has been made within recent years is the best evidence of the possibilities of the future. I trust that you will take pleasure in having a share in this movement to furnish better advantages to the young men and women who come to us to secure preparation for their life-work.

If you are willing to help us in this effort, please fill out the blank printed on page 13 and send it to the President of the College, or to Mr. J. E. Howard, the Treasurer, Carew Building, Cincinnati, Ohio.

Yours for service,
A. Gaylord Slocum,
President.
Faculty

ARTHUR GAYLORD SLOCUM, LL. D.,
President, and Professor of Mental and Moral Philoso­phy.
117 Woodward Avenue.
