THE KALAMAZOO COLLEGE.

The plan of establishing The Kalamazoo College, or, as it was known in its early days, "The Kalamazoo Literary Institute," originated with the Rev. Thomas W. Merrill, a graduate of Waterville College, now Colby College. He worked and traveled continuously for several years to raise the necessary funds, and to obtain a charter. The Hon. Caleb Eldred and others were also actively interested in the foundation and organization of the College.

The original charter for "The Michigan and Huron Institute," or, as it was later named, "The Kalamazoo Literary Institute," was granted April 22, 1833. The following extract from this charter makes the character of the institution sufficiently evident: "Said trustees shall establish in said territory at such place as they may judge best, a Literary Institute, to promote the knowledge of all those branches of education usually taught in academies and collegiate institutions." For a few years following 1837, the school was a "branch" of the University of Michigan.

In February, 1855, a college charter of liberal nature was granted by the legislature. By this instrument the Trustees are empowered to hold and administer the property of the College, to direct its policy, to elect its President and Faculty, and to confer degrees, "provided that the primary degrees shall not be conferred on any student who shall not have passed through a course of studies equivalent to, and as thorough as, that prescribed..."
by the Regents of the University of Michigan." By this charter women were granted equal privileges with men, so that Kalamazoo was one of the first co-educational colleges in America. The original policy of having a theological seminary in connection with the College was early abandoned.

During the college year, 1895-96, an agreement for mutual advantage was consummated between the College and the University of Chicago. By the terms of this agreement the College is known as a College Affiliated with the University of Chicago. (See Affiliation.)

In 1835, the citizens of Kalamazoo contributed the sum of $2,500 to the institution, and a tract of land in what is now the southern part of the city. Temporary buildings were built in 1836. This land was sold and the men's dormitory was erected in 1848-50, on the present grounds of the College, in the western part of the city. The Baptists of the State, who had been from the first the principal supporters of the College, raised the necessary funds. Kalamazoo Hall was built in 1857, by citizens of Kalamazoo. Ladies' Hall, the women's dormitory and refectory, was built by the Ladies' Hall Association of the state and transferred to the College in 1887. Bowen Hall, named in recognition of the valued personal services and the great liberality of the late C. C. Bowen of Detroit, was dedicated June 16, 1902.

THE FACULTY.

ARTHUR GAYLORD SLOCUM, LL. D., President and Professor of Mental and Moral Philosophy.
117 Woodward Avenue.
A. B., University of Rochester, 1874; A. M., ibid., 1877; LL. D., ibid., 1892; Principal, Rochester Collegiate Institute, 1874-75; Principal, Riverside Collegiate Institute, Wellsville, N. Y., 1875-76; Superintendent of Schools and Principal of Free Academy, Corning, N. Y., 1876-92; President, Kalamazoo College, 1892.

SAULIUE BROOKS, D. D., Charles Villard Professor of the Latin Language and Literature.
710 West Lovell Street.
A. B., Brown University, 1852; A. M., ibid., 1855; D. D., Franklin College, 1875; Instructor in Greek, Brown University, 1854-55; Graduate, Newton Theological Institution, 1857; Pastor, Beverly, Mass., 1857-60; Instructor in Hebrew, Newton Theological Institution, 1860-61; Pastor, South Framingham, Mass., 1862-64; West Medway, Mass., 1866-69; Professor of Latin, Kalamazoo College, 1869.

STANLEY GEORGE JENKS, B. S., Professor of Chemistry and Physics.
1555 West Main Street.
B. S., University of Michigan, 1891; Instructor in Physical Sciences, Lansing High School, 1887-89; Assistant in Qualitative Chemistry, University of Michigan, 1890-91; Professor of Natural Sciences, Kalamazoo College, 1891.

CLARKE BENEDICT WILLIAMS, A. M., Olney Professor of Mathematics.
516 West South Street.
A. B., Princeton University, 1890; A. M., ibid., 1895; J. S. K. Fellow, ibid., 1890-91; Instructor in Mathematics, ibid., 1890-92; Student, University at Gottingen, 1892-93; University at Leipzig, 1893-94, 1901-03; Professor of Mathematics, Kalamazoo College, 1894.

HERBERT LEE STITSON, D. D., LL. D., Professor of Psychology and Pedagogy.
326 West Kalamazoo Avenue.
B. D., Baptist Union Theological Seminary, 1878; B. D., The University of Chicago, 1900; A. M., Franklin College, 1886; D. D., ibid., 1889; LL. D., Des Moines College, 1901; Pastor, Logansport, Ind., 1878-87; Des Moines, Iowa, 1887-89; Editor, Indiana Baptist, 1886-89; Professor of History and Philosophy, and President, Des Moines College, 1889-1900; Lecturer, Psychology, University of Chicago, summer, 1902; Professor of Psychology and Pedagogy, Kalamazoo College, 1900.

GEORGE ABNER WILLIAMS, Ph. D., Broadus Professor of the Greek Language and Literature.
136 Thompson Street.
A. B., Colgate University, 1880; A. M., ibid., 1883; Ph. D., ibid., 1890; Principal, Hamilton Union School, 1880-82; Instructor in Greek and History, Cook Academy, 1882-89; Principal, Vermont Academy, 1889-95; Instructor in Greek, Brown University, 1895-98; Classical Master, University School, Providence, R. I., 1896-99; Assistant Professor of Greek, Brown University, 1899; Instructor in History and Latin, Phillips Exeter Academy, 1900-02; Professor of Greek, Kalamazoo College, 1902.
ELIAS JOHN MacEWAN, A. M., Professor of the English Language and Literature.  
314 Elm Street.
Ph. B., Kalamazoo College, 1874; A. B., ibid., 1875; A. M., ibid., 1877; Principal, High School, Kalamazoo, Mich., 1876-78; President, Colby Academy, 1878-80; Professor of English and Modern Languages, Michigan Agricultural College, 1880-90; Fellow in English, Johns Hopkins University, 1885-86; Student, University of Berlin, 1891-92; Professor of the English Language and Literature, Kalamazoo College, 1902.

ORLANDO CLARKE CHARLTON, A. M., Professor of Biology and Geology.  
110 Michigan Avenue.
B. S., Hanover College, 1872; A. M., ibid., 1885; Graduate Student, Sheffield Scientific School, 1875-76; Wood's Holl (summer), 1889; University of Chicago, (summers), 1895-7, 1901-03; Teacher, Public Schools, Indiana, 1876-85; Professor of Natural Sciences, Ottawa University, 1885-91; Texas Normal College, 1891-93; Baylor University, 1895-96; Professor of Biology and Geology, ibid., 1901-02; Kalamazoo College, 1902.

PETER A. CLAASSEN, A. B., Professor of German and French.  
809 West Walnut Street.
A. B., Kansas State University, 1896; Teacher, Public Schools, Kansas, 1895-97, 1899; Student, Germany, 1897-99; Instructor in German, Kansas State Normal, 1894-95; Professor of Modern Languages, South West Kansas College, 1896-1902; Graduate Student, University of Chicago, (summers), 1898, 1901-02; Professor of German and French, Kalamazoo College, 1902.

LUCY HOWARD JOHNSON, A. M., Instructor in Latin and History.  
422 West South Street.
Ph. B., University of Michigan, 1893; A. M., Radcliffe College, 1901; University of Chicago, Summer Quarters, 1895 and 1896; Graduate Student, Radcliffe College, 1900-01; Instructor, Kalamazoo College, 1893.

ELLA LOUISE FULTON, A. B., Instructor in Mathematics and German.  
Ladies' Hall.
A. B., Kalamazoo College, 1901; A. B., University of Chicago, 1901; Instructor in Mathematics, Kalamazoo College, 1901.

ELIZABETH AXTELL, A. B., Instructor in English and History.  
522 McCourtie Street.
A. B., Kalamazoo, 1902; A. B., University of Chicago, 1902; Instructor in English and History, Kalamazoo College, 1902.

MRS. E. A. READ, Instructor in Piano, Organ and Harmony.  
826 West Kalamazoo Avenue.

OTHER OFFICERS.

STILLMAN GEORGE JENKS, B. S., Secretary.
HERBERT LEE STETSON, LL. D., Librarian.
LEROY HIBBARD WHITE, Steward.
THE COLLEGE.

ADMISSION.

Candidates for admission to the College are expected to present themselves at the President's office in Bowen Hall at 9 A.M., September 20, 1904. They must present satisfactory evidence of good moral character, including credentials from their last instructors, or from the institutions in which they were prepared.

ADMISSION OF CANDIDATES FOR THE BACHELOR'S DEGREE.

Candidates for the Bachelor's Degree are admitted to the College either (1) by examination, or (2) by certificate.

1. Entrance examinations will be held in Bowen Hall at 9 A.M., September 20, 1904. Satisfactory examinations must be passed in the subjects mentioned below.

2. Graduates of high schools approved by the Faculty may be admitted to the Freshman class, in the course for which they are prepared, on the presentation of satisfactory certificates of work done, and of recommendations for admittance from the high school authorities. These certificates will be accepted only in so far as they give detailed statements of the extent and grade of preparatory work; and, without special faculty action, only when presented within one year and four months of the time of graduation.

The list of Approved Schools includes all schools approved by the University of Michigan and all schools affiliated or co-operating with The University of Chicago.

COURSES OF STUDY.

There are three courses of study leading respectively to the degrees of Bachelor of Arts, Bachelor of Philosophy and Bachelor of Science. Each of these courses extends through four college years of thirty-six weeks and consists of certain required studies and of a certain number of other studies selected by the student from the various departments.

All of the Freshman work and two-thirds of the Sophomore work is required, while in the Junior and Senior years, excepting the Junior year of the Scientific course, only one-third of the work is required and the student is encouraged to choose studies for which he has especial qualifications. He is thus able to pursue a comparatively extended course in some one or two departments.

In addition to the courses specifically mentioned in the statement of courses of the various departments, the members of the Faculty may offer advanced optional courses leading to special honors.

I. PHILOSOPHY.

The President and Professor Stetson.

The aim of this department is to awaken interest, to encourage independent inquiry, to secure careful and accurate thinking, and to establish the student in sound views upon the fundamental questions of life.

It is believed that a knowledge of the laws of his own intellectual and moral nature is of prime importance to the student in determining his possibilities as well as his
limitations, and that familiarity with what already has been accomplished in the domain of philosophic thought is the best preparation for solving the intricate problems of the present day.

Courses.

1. Logic. Professor Stetson. The work rests on the following definition: Logic is "the science of the conditions on which correct thoughts depend, and the art of attaining to correct and avoiding incorrect thoughts," and therefore is devoted to (1) the critical examination of necessary principles and forms of thought to determine in what correct thinking consists, and (2) the consideration of the rules for detecting and avoiding false reasoning. Five hours. Winter term. Junior year. Required.

2. General Psychology. Professor Stetson. A critical inquiry into the processes and powers by which knowledge is produced and conduct arises. The nature of the work is both analytic and synthetic. Five hours. Spring term. Junior year. Required.

3. History of Philosophy. Professor Stetson. Origin, conception and name of Philosophy and its relation to other sciences; factors and tasks of History of Philosophy, its value as a discipline and its main genetic divisions. The most of the time is devoted to some one period, preferably that from Des Cartes to Kant. The main problem considered is the theory of knowledge, and considerable effort is made to relate the history of the thought of this period to its actual life and literature. Five hours. Fall term. Senior year. Required.

4. Ethics. The President. Critical study of the character and development of the moral nature. The practical application of moral principles to human conduct and life. Dependence of all right action upon a proper understanding of man's relation and accountability to his Creator. Five hours. Winter term. Senior year. Required.

5. Evidences of Christianity. Professor Stetson. An apologetic presentation of the Christian faith with reference to whatever in our intellectual environment makes faith difficult at the present time. An impartial comparison is made of the Christian theory of the universe with other theories current in our day. Five hours. Spring term. Senior year. Required.

II. PEDAGOGY.

Professor Stetson.

The work in this department is organized with special reference to fitting students for the teaching profession. For those who elect it this work forms an integral part of the courses in the Senior year. Students, who satisfactorily complete the requirements in this department and who give evidence to the Faculty of ability to teach, are, upon graduation, granted the State Teacher's Certificate by the Department of Public Instruction of the State of Michigan. All the following courses are required of students who desire this Certificate but are elective for all others.

Courses.

1. Educational Psychology. The study of the growing self with special reference to forming a working theory of instruction. Must be preceded by General Psychology. Five hours. Fall term. Senior year.

III. HISTORY OF ART.

The President.

A brief outline of the principles of art. Study of the development of architecture, sculpture and painting. Description of some masterpieces in each, with brief sketches of famous artists. Five hours. Spring term. Senior year. Elective.

IV. BIBLICAL LITERATURE.

Professor Stetson.

The work in the study of the Bible is based on an English translation, and the purpose is to secure a knowledge of the various conditions under which the portions considered were produced and then to gather the principles which are applicable to the present.

Courses.

1. Life and Times of Jesus. The leading events in the life of Jesus and the conditions of his times are studied with a view to interpreting his teaching. Five hours. Winter term. Sophomore year. Elective. Given alternate years with 2. Given in 1905.

V. SOCIAL AND POLITICAL SCIENCE.

The President and Professor Stetson.

This work has been organized with special reference to the development of consistent ideals of human welfare. The claims of society upon each of its members are kept constantly in view. It is believed that a knowledge of the social, political and economic forces in their mutual relation will aid students in rightly assuming the duties of citizenship.

Spring term. Must be preceded by 1, 2 and 3. Elective in A. B. and Ph. B. courses.

IX. GERMAN.

Professor Claassen.

The purpose of the work of the first year is to secure a thorough knowledge of the fundamental principles of the German language, and to acquire an extended vocabulary.

In order that the student may acquire the ability to understand and to think in German, the work of the classroom is carried on in German, so far as practicable, and German prose composition is made an important feature of the work. Special attention is given to construction and to cognates.

After the first year the aim is to become familiar with the best German literature. One or two masterpieces from each of the authors, Lessing, Schiller and Goethe, some minor poems from Schiller and Goethe and poems of later date, and some modern work are read. The historical dramas require special study and collateral reading.

If French is offered for entrance in the Ph. B. or B. S. course, the required courses and the order of the courses in French and German are interchanged.

Courses.

*7. Modern German Literature, following Kluge or Koenig. Library work and class reports. One drama and one novel of Sudermann read in class. Each student reads and writes in German a review of one modern masterpiece of fiction or drama outside of class. Composition. Five hours. Fall term. Elective.

*8. Modern and classic German literature. Continuation of 7. Hauptmann—Der arme Heinrich and several of Goethe’s works read in class. Each student reads and writes in German a review of two modern or classic masterpieces outside of class. Composition. Five hours. Fall term. Elective.

Honor Courses.
Honor courses for eligible students are offered. Sudermann—Johannes. Goethe—Faust.

Courses 7, 8 and 9 may be elected only by students who present two years of preparatory German and who have completed courses 4, 5 and 6.
XVII. BIOLOGY.

Professor Charlton.

The biological laboratory is large and well lighted and affords good facilities for microscopic work and dissections. A minimum of four hours per week of laboratory work is required. Two hours of laboratory work is considered equivalent to one recitation.

1. Invertebrate Zoology. A general course. In laboratory work dissections, drawings and descriptions are required. The forms studied include Amoeba, Hydra, Hydroids, Starfish, Lobster, Crayfish, Earthworm and Fresh Water Mussel. Topics of general biological interest are considered. Five hours. Fall term.

2. Vertebrate Zoology. Lectures and recitations on vertebrates from Amphioxus to Man. Laboratory work on forms usually including Amphioxus, Dogfish, Frog, Pigeon and some mammal. Five hours. Winter term.

4. Histology. Lectures, demonstrations and laboratory practice. The course is devoted chiefly to the study of the tissues of mammals, including those of man. Considerable work in the hardening, imbedding, sectioning, staining and mounting of tissues. Five hours. Fall term.

XVIII. GEOLOGY.

Professor Charlton.

General Geology. Text-book work, supplemented by lectures and when possible by field work. Should be preceded by one or more courses in Chemistry. Five hours. Spring term.

German 7. | German 8. | German 9.

Rhetoric 3.

Three chapel orations.
SENIOR YEAR.

Fall Term.
- History of Philosophy
- Pedagogy 1
- Economics

Winter Term.
- Ethics
- Literature 5
- Pedagogy 2

Spring Term.
- Evidences of Christianity
- History of Art
- International Law

Two chapel orations. Graduation oration.

Electives not chosen when offered may be taken in subsequent years.

*If French instead of German has been offered for entrance, the required courses and the order of the courses in French and German are interchanged.

GENERAL COLLEGE REGULATIONS.

PUBLIC WORSHIP.

Public worship, which all students, not expressly excused by the President, are required to attend, is held each morning in the College Chapel.

Each student is expected to choose one of the churches of the city and to attend its services with regularity.

MATRICULATION.

Every student must matriculate before entering upon any college study. The matriculation fee is five dollars and is required but once.

EXAMINATIONS.

At the end of each term, students are examined in all studies of the term. In general these examinations are written. Besides these final examinations, partial examinations or written recitations may be held during the term.

A student who receives a condition in a course must remove the condition before the course is given again; otherwise he is required to take the course with the next class. Examinations for the removal of conditions are held on the sixth Saturday of each term.

STANDING.

The student's term-standing is found by combining the examination and the recitation marks, account being
taken of absences. Every student receives a report-card at the end of each term, on which the term-standing is expressed by the letters A, B, C, D and E. A signifies very good; B, good; C, medium; D, condition; E, failure. Students with standing E in any study receive no credit in that study; those with D may receive credit after passing a second examination.

CLASSIFICATION.

Regular Classes.
Any student who does not lack more than three entrance credits in any one of the regular courses, may be classified as a Freshman. After the Freshman year, students are classified as to class and course in accordance with the number of credits received and the amount of required work completed.

Special Students.
All students, who by Faculty action have been admitted to do special work in any department, are known as Special Students.

Unclassified Students.
Candidates for the bachelor's degree who lack more than three credits of regular standing in their classes and all others who are not candidates for degrees are designated as Unclassified Students.

HONORS.

Honors are awarded to students of the College under the following conditions:

Eligibility.
Any student in regular standing in one of the four college classes, who is not delinquent in any study, may become a candidate for honors providing his average standing for the year preceding his candidacy is at least B and his standing in the department in which honor is sought is A. Freshmen who have no entrance conditions may become candidates for honors by action of the Faculty.

Required Work.
Honors are awarded at the end of the college year for extra work, assigned and directed by the instructors in the several departments and equivalent in amount to a two-hour course throughout the year. Proficiency is tested by examination and by a thesis if the instructor so desires. If during the year the standing falls below the minimum required for candidacy for honors, the student may be debarred. No student may become a candidate for honors in more than one department at the same time without special permission from the Faculty. Each candidate for honors during the year 1904–1905 must register his name and a statement of the department in which honors are sought with the Secretary on or before October 31, 1904.

The names of all recipients of honors are announced at Commencement and are printed in the annual catalogue of the College.

PRIZES.
The following prizes are offered:

1. The Sherwood Prize, endowed by the late Rev. Adiel Sherwood, D. D., of St. Louis, is given for the best delivery of a declamation by a Freshman at a public contest.

2. The Cooper Prize, endowed by the late Charles Cooper, Esq., of White Pigeon, is given for the best delivery of an oration at the Junior Exhibition.
3. A prize is offered by Mr. L. C. Lull, of Kalamazoo, for the best oration at Commencement. The thought, style and delivery are to be considered in making the award.

4. Two prizes, one for Freshmen and one for Sophomores, are offered by Mrs. Mary C. Miller, of Kalamazoo, for excellence in Mathematical work for the year.

5. Two prizes, established in memory of the Rev. Marvin G. Hodge, D. D., are awarded to those members of the graduating class who, having taken all the work offered in Philosophy, have the highest standings in this department.

6. A prize is offered by the Hon. Samuel Folz, for excellence in the first year's work in German.

7. A prize is offered by the Hon. Albert M. Todd, for excellence in the first year's work in Chemistry.

FELLOWSHIPS.

The University of Chicago each year grants three Fellowships to members of the graduating class of Kalamazoo College.

Each Fellowship gives the holder free tuition for one academic year in the graduate schools of The University of Chicago.

BACHELOR'S DEGREE.

Every student who has successfully completed the required work of one of the regular courses and sufficient elective work to make thirty-seven credits in all, is recommended by the Faculty to the Board of Trustees as a proper candidate for the bachelor's degree. If the Board acts favorably, the candidate receives publicly at the Commencement exercises a diploma signed and sealed by official representatives of the Board.

MASTER'S DEGREE.

Graduate Courses.

Whenever permission to do graduate work in any department is granted, the head of the department outlines a suitable course and supervises and directs the work during its continuance.

Eligibility.

Any graduate of the College, or of any other college in good standing may become a candidate for the degree of Master of Arts or of Master of Science by action of the Faculty. The candidate must have completed all the undergraduate work offered in the department of his principal subject or its equivalent. (See below.)

Required Work.

The candidate must complete at least one full year of advanced work in residence or its equivalent. No one who does not give all his time to the work shall receive the degree in less than two years. Two-thirds of the work must be done in one department and the other subjects must be related to this principal subject. The candidate after consultation with the head of this department must submit to the Faculty for ratification a written statement of all the courses chosen for the degree. The work shall be tested by examination and by a thesis on some topic connected with the principal subject.

ADJUSTMENT OF CREDITS.

All applications for credit for work done elsewhere and proper evidence of work done must be filed in writing with the Secretary during the first year of residence. All such applications and other communications addressed to the Faculty are considered at the regular Monday meetings of the Faculty.
Kalamazoo College is now working under the terms of affiliation with The University of Chicago. The provisions of affiliation, which are of general interest are as follows:

1. The President of the College is a member of the University Congregation.
2. The Faculty and courses of study of Kalamazoo College are endorsed by The University of Chicago.
3. Students, whose work in the College is satisfactory and whose examinations are approved by the University, receive credit on the University records for work done in the College.
4. Such students, on graduation from the College, may secure without tuition fees the corresponding degrees at the University after completing twelve weeks' additional work there.
5. Each year one graduate of the College in the A. B. course receives the University degree without additional work.
6. Each year three students who have earned the Bachelor's degree receive Fellowships entitling them to tuition for one year in the Graduate Schools of the University.
7. Apparatus and books for use in any department are loaned by the University to the College and special lecturers and instructors for temporary service can be secured from the University.

By the agreement thus outlined, the evident advantages of the College and those of the University are combined. The students of the College, while doing their work in small classes, coming into personal contact with their instructors and securing their education at limited expense, have the advantage of having their work brought into constant comparison with that of the University.

The period of twelve weeks spent at the University in securing its degree naturally leads to a desire to continue in graduate work.

The tendency of affiliation is to strengthen the courses of the College and to give greater efficiency to its work.

Undergraduate students who so desire may spend the summer quarter at the University and receive credit for such work in the College.
GENERAL INFORMATION.

LOCATION.

Kalamazoo is a beautiful and prosperous city of about thirty thousand inhabitants. Four lines of railroad passing through the city make it easily accessible from all directions.

The location of the Kalamazoo College grounds, comprising twenty-five acres, between Academy and West Lovell streets, is one of the best and most healthful in the city. The dormitories and Bowen Hall are finely situated on College Hill. Kalamazoo Hall and the athletic field are on the level ground at its foot.

BUILDINGS.

There are four buildings on the college grounds. Bowen Hall, the main class, laboratory and office building, is situated on College Hill near Lovell street. The chemical and physical laboratories are in the high and well lighted basement; the reception room, the executive offices, six class rooms and the biological laboratory on the first floor; the library and eight class rooms on the second floor; the chapel, the Young Men's and the Young Women's Christian Association rooms on the third floor. The building is heated by steam with indirect radiation, and lighted by gas and electricity.

Kalamazoo Hall, the recitation building for the preparatory department is on the lower campus, near Michigan avenue. The Eurodelphian Society Hall is in this building.

The Men's Dormitory is situated on College Hill just north of Bowen Hall and contains thirty-one study rooms each with an adjoining sleeping room. The rooms of the Sherwood Rhetorical Society, the Philolexian, Lyceum and the Century Forum, are in this building.

The woman's dormitory, known as Ladies' Hall, has an attractive situation on College Hill near Academy street. Each room is designed to be occupied by two students. The building is suitably furnished. The refectory is in this building.

COLLEGE LIBRARY.

The College Library contains nearly eight thousand bound volumes and three thousand five hundred pamphlets. The standard encyclopedias, dictionaries and other books of reference are included. Through the liberality of F. R. Welles, Esq., of Paris, France, and the income from the Olney estate, about three hundred and fifty dollars is available annually for new books.

The working library has been installed in its new room in Bowen Hall. This room is large, well lighted and located so as to be conveniently used by students in all departments.

OTHER LIBRARY FACILITIES.

The literary societies of the College have libraries aggregating about two thousand volumes.

The Public Library of the city is available to students of the College without expense. This library contains thirty thousand bound volumes and is growing at the rate of twelve hundred volumes a year. The reading room is supplied with one hundred and fifty periodicals.
The library of the Ladies' Library Association is open to the young women on payment of a small fee. There are about three thousand bound volumes in this library. Thus forty-three thousand bound volumes are accessible to the students.

LABORATORIES AND APPARATUS.

Chemical Laboratory.
The Chemical Laboratory occupies the entire western section of the basement of Bowen Hall, thus being lighted from three sides. It contains tables for forty-eight students, besides ventilating hoods, and side tables. The balances occupy a separate room fitted with stone shelves supported free from the walls of the building. The supply of chemicals and apparatus occupies a separate room. There is a small private laboratory designed for special courses and honor work.

Physical Laboratory.
The Physical Laboratory occupies two large rooms, besides a small balance room, in the basement at the south end of the building. The equipment is such as to furnish a course of experimental work throughout the year, making a part of courses 1, 2 and 3 Physics. A special dark room is provided.

Biological Laboratory.
The Biological Laboratory occupies a large room on the first floor, well lighted from the north and west. It is fitted with water, gas, reagents, microscopes, microtome, aquarium, etc., sufficient for individual work by twenty-four students at one time.

Projection Lantern.
There has just been added a projection lantern for the projection of lantern slide views, chemical experiments and physical and biological demonstrations. Beside the ordinary lantern, the apparatus is provided with an optical bench, and accessories for microscopic projection and demonstrations with polarized light. Polarized light may be used in the microscopic projections.

The light source is an electric arc lamp and is bright enough to enable excellent results to be obtained in a room light enough to enable the students to take notes without difficulty.

Mathematical Models.
The College has a good set of models of the surfaces of the second degree. They show the circular sections and the rectilinear generators.

Apparatus for the illustration of most of the subjects that come up in the other sciences is sufficient for classroom use.

LADIES' HALL.

Ladies' Hall, the women's dormitory, furnishes a home, where the best opportunities for successful work are combined with the advantages of a Christian family life.

The supervision of the Hall is intrusted to a member of the Faculty and the regulations are few and simple. It is believed that the Hall life, with its strong religious influence and its atmosphere of culture and refinement, can do much in the development of a true and noble womanhood.

While young women are not required to board at the Hall, the advantages offered them in supervision, care of health, regularity of habits, wise counsel, congenial society and favorable opportunity for study, are such that young women are urged to consider them before locating elsewhere.
Preceptress of the Hall, Miss Ella Louise Fulton; Matron, Mrs. Archibald Wheaton.

CHRISTIAN ASSOCIATIONS.

The Young Men's and Young Women's Christian Associations have an important place in college life and include most of the students in their membership. Both these Associations have rooms in Bowen Hall.

An important part of their work consists in helping new students to adapt themselves to college life. For this purpose the associations issue a handbook of information and during the first weeks of each term hold receptions at which new students become acquainted with the older ones and with one another.

LITERARY SOCIETIES.

There are four active and flourishing literary societies among the students: the Sherwood Rhetorical Society, founded in 1851; the Philolexian Lyceum, founded in 1855; the Eurodelphian Society, founded in 1856; and the Century Forum, founded in 1900. The Eurodelphian Society is for young women and the other three for young men.

The regular business and literary meetings are held on Friday evening of each week. This literary work is a valuable adjunct to the regular college curriculum and is actively encouraged by the Faculty.

Open meetings, at which debates are held and literary programmes are given and to which the public is invited, are held from time to time. During the second term of each college year there are public debates on topics of current interest between debaters chosen from the men's literary societies.

ORATORICAL ASSOCIATION.

This Association has for its purpose the promotion of an active interest in oratory and debating. During the winter term a public contest is held, the successful competitor in which represents the Association in the annual contest of the Michigan Oratorical League. The Association also has charge of the debating contests between Kalamazoo and other colleges. All college students doing full college work are eligible to membership and are encouraged to identify themselves with this organization.

THE COLLEGE JOURNAL.

The College Index, a monthly magazine, is published by the Students' Publishing Association. It contains College and Alumni news and literary contributions from students, alumni and members of the Faculty. The Publishing Association offers several money prizes each year for the best stories, essays and poems submitted.

ATHLETICS.

A healthful interest in Athletics is approved and encouraged by the Faculty. There is a standing Faculty committee on athletic sports to which all important questions are submitted for advice and approval.

The Students' Athletic Association is a branch of the Michigan Inter-Collegiate Athletic Association. Outdoor athletic sports are managed by the Athletic Association, with the co-operation of the Faculty committee on athletics. The athletic field is on the college campus near the men's dormitory.

Students who desire to train for the various events are required to maintain a good standing in their classes and to present certificates of physical fitness from medical
advisers. Those under age must also secure permission from parents or guardians. The rules of the Inter-Collegiate Association are enforced.

For indoor gymnastics the Y. M. C. A. of the city offers courses in training under a physical director at special rates to students.

EXPENSES.

All bills must be paid in advance.

For Young Men.

*Regular tuition ....................... $10.00 per term.

Room-rent in the Dormitory:
- Corner rooms ....................... $5.00 per term.
- Side rooms ......................... $4.00 per term.
- Table board at Ladies' Hall ........ $2.50 per week.

Summary for term of 12 weeks:
- Tuition ................................ $10.00
- Board 12 weeks ..................... $30.00
- Room-rent in Dormitory .......... $5.00

Total ................................ $45.00

This does not include laundry, fuel, lights, books or furniture. Some of the rooms are furnished, others not. The assignment of rooms is in the hands of the Steward.

There are also approved private boarding-houses near the College, at which board either with or without rooms can be obtained at rates corresponding to the above.

Students sometimes board themselves in their own rooms in private houses, or get their meals in clubs, and thus diminish their expenses. No student rooming in the Dormitory is permitted to board himself.

*Students allowed to carry a fourth subject pay $3.00 extra per term.

For Young Women (at the Hall.)

*Regular tuition ....................... $10.00 per term.

Table board ........................ $10.00 per term.

Room-rent, $1.00 or 75 cents per week, according to location.

Pupils who are to some extent dependent on themselves may receive permission from the chairman of the Ladies' Hall committee to assist in the domestic duties of the Hall one hour each day. A deduction of 50 cents per week in the price of board is made for these services.

The occupants of rooms are expected to furnish their own sheets, pillow slips, towels, white spreads and soap. No charge is made for fuel and lights or for the washing of room linen.

A telephone connects the building with the general city service.

Laboratory.

Students taking work in the Chemical Laboratory deposit with the Steward an amount sufficient to cover cost of material used during the term. Any unused portion of this is returned at the end of the term. This deposit is $2.00 each for the first and second terms and $5.00 for the third term.

To cover cost of material and use of apparatus in Biology a charge of $1.00 per term is made for work in the Biological Laboratory.

PECUNIARY AID.

Aid is furnished worthy and needy students from the following sources:

1. The Board of Kalamazoo College and Ministerial Education provides for the tuition and room-rent of its

*Students allowed to carry a fourth subject pay $3.00 extra per term.
beneficiaries and renders further aid if the funds at its disposal warrant. This aid is usually given only to college students.

2. The incomes of the endowed scholarships are used for the aid of students.

3. Individuals and churches sometimes place money in the hands of the President to be used for the same purpose.

4. There is each year a fund of $150.00 in the hands of the President to be loaned to deserving students and to be reloaned on repayment.

ENDOWED SCHOLARSHIPS.

Taft Fund.
This gift of $2,520 was made by Lewis A. Taft, and the income is to be used for indigent students.

Axtell Fund.
This gift of $1,000 was made by Mrs. Hannah E. Axtell, and the income is to be used for ministerial education.

Caleb Van Husan Memorial Scholarship.
This scholarship of $1,000 was established by the widow and children of the late Caleb Van Husan, and the income is to be used to aid some deserving and needy student.

Charles Willard Scholarships.
By bequest of the late Charles Willard, of Battle Creek, the College is able to offer a limited number of scholarships, varying in amount from $90.00 to $150.00 per year. These are granted on the recommendation of a committee, and the recipients are expected to render some service to the College under direction of the President.

ENDOWED PROFESSORSHIPS AND MEMORIAL FUNDS.

Attention is called to the necessity of having professorships in all departments fully endowed.

The following professorships have been fully endowed:
The Olney Professorship of Mathematics.
The Charles Willard Professorship of Latin.
The John A. Broadus Professorship of Greek.
The following have been partially endowed:
The Alumni Professorship.
The Kalamazoo City Professorship.
The interest from the following memorial funds goes toward meeting current expenses:
Merrill Fund.
Fellows and Tait Memorial Fund.
Charles M. Averell Memorial Fund.
DEGREES CONFERRED.

June 17, 1903.

DOCTOR OF DIVINITY (D. D.)
Rev. William M. Upcraft, - - - China.

BACHELOR OF ARTS (A. B.)
Margaret Jenness Boyden, - - - Kalamazoo.
Stewart Bates Crandell, - - - Kalamazoo.
Flora Belle Hermann, - - - Ithaca.
Amelia Elizabeth Kirkland, - - - Kalamazoo.
Robert Abram McMullen, - - - Bay City.
Charles Lewis Owens, - - - Hastings.
Lydia Little Smith, - - - La Moille, Ill.
LeRoy Branch White, - - - Kalamazoo.

BACHELOR OF PHILOSOPHY (Ph. B.)
Maud Emily Barkenbus, - - - Kalamazoo.
Fred Grandville Burnett, - - - Kalamazoo.
Edith Gray Cowgill, - - - Kalamazoo.
Burt Arlington Hatch, - - - McGregor, Iowa.
Frances Jean Larned, - - - Kalamazoo.

PREPARATORY DEPARTMENT.

ADMISSION.

All persons who desire to enter the Preparatory Department are expected to report at the President’s office in Bowen Hall at 9 a.m., September 20, 1904. They must present credentials of good moral character.

Requirements for admission to the second year’s work are substantially the same as for entering the second year classes of a good high school. (See page 71.) Certificates of work completed in other schools of recognized standing and equivalent to that of our courses, are accepted and credit is given for the same.

COURSES OF STUDY.

There have been up to the present time three regular courses of study, the Classical, the Latin-Scientific and the Scientific. Each of these courses extended through four years and prepared the student to enter the corresponding college course. Pupils completing any one of these courses are admitted to the College without examination. During the year 1904–5 no first year courses, excepting those in Latin, are offered and no new pupils will be admitted in the first and second year classes of the Scientific course.

GENERAL REGULATIONS.

The Preparatory Department is under the direct supervision of the College Faculty. The pupils may have rooms in the Dormitory and are under the same regulations as the college students.

EXPENSES.

Fees and expenses are the same as for the College except that no matriculation fee is charged.

PECUNIARY AID.

The tuition and room-rent of pupils in the Preparatory Department are sometimes paid from funds contributed for this purpose. Preference is given to members of the third and fourth year classes. Occasionally pupils receive assistance from funds designated for their use by churches or individuals.

ANNOUNCEMENT.

No courses for the first year of the Preparatory Department, excepting those in Latin, are offered during the college year 1904–5. No new pupils will be admitted to the first and second year classes of the Scientific course during the year 1904–5.
COURSES OF STUDY.

LATIN.

The study of Latin is begun in the first year and continued through the fourth as a required subject in the Classical and Latin-Scientific courses. Latin is optional in the first and second years of the Scientific course.

The four years' work should give a thorough knowledge of the inflections of the language; the ability to read the Latin smoothly with some comprehension of the thought of the author; the power to translate easy Latin at sight; such a knowledge of syntax as will enable the pupil to transpose, into Latin, paragraphs of English prose based upon the texts read; a degree of appreciation of the literary worth of the authors studied with a knowledge of their times.

*First Year.*

Latin lessons; translation of fables and selections from Viri Romæ.

*Second Year.*

*Third Year.*

*Fourth Year.*

Ovid, selections from short poems and from the Metamorphoses, about fifteen hundred lines. Vergil’s Æneid, Books I-VI. Attention is given to Scansion, Mythology, Roman Private Life, The History of the Augustan Age.

GREEK.

Greek is a required study in the third and fourth year of the Classical course. The first year is given principally to the mastery of the forms, syntax and common idioms of the language, and to securing a working vocabulary. This is done in connection with the reading of simple but continuous Greek prose, with daily exercises in prose composition. One book of the Anabasis is completed the first year. In the second year Books II-IV of the Anabasis and three books of Homer are read. Books I and II of the Hellenica may be substituted for Books III and IV of the Anabasis.

The aims in view are thorough preparation for the higher courses, and proficiency in the accurate use of English in translation.

*Third Year.*

Fall and winter terms: First lessons, based upon the first five chapters of the Anabasis. Spring term: Anabasis, Book I completed.

*Fourth Year.*

Fall term: Anabasis, Book II. Winter term: Anabasis, Books III and IV, or Hellenica, Books I and II. Spring term: Three books of the Iliad or Odyssey.

GERMAN.

German is a required study in the third and fourth year of the Latin-Scientific and Scientific courses.

*This course is offered during the year 1904-5. See page 71.*
The work of the first year includes a careful study of accidence, syntax, word elements and cognates. Translations into German are made, and easy dramas and works of fiction are read.

The second year is devoted to obtaining a more thorough knowledge of German grammar, to classics and modern prose and to translation from English into German. The work of the class-room is largely carried on in German.

**Third Year.**

Fall term: Grammar. Prose composition.

Spring term: Modern prose. Composition.

**Fourth Year.**

Fall term: Modern prose. Composition.

Winter term: A classic or modern prose, or Freytag's Journalisten. Composition.

**English Literature.**

In the course in English Literature, the outline prepared by the "Committee of Ten" has been adopted. See requirements for admission to the College (pages 16-20). Required.

**Mathematics.**

**Second Year.**

Algebra. Fall term: The four elementary operations, simple equations and simultaneous equations of the first degree. Required.

Winter Term: Factoring, highest common factor, lowest common multiple, fractions, equations with fractions, involution and evolution. Required.

Spring term: Quadratic equations, the progressions, binomial theorem—positive integral exponents, fractional and negative indices, surds and imaginaries. Required.

**Third Year.**

Geometry. Much time is devoted to so-called original problems and theorems.

Fall and winter terms: Plane Geometry. Required.

**Fourth Year.**

Review. Spring term: A thorough review of Algebra; special attention given to the four elementary operations, to factoring, to the solution of simple and quadratic equations, to the use of surds and to the theory of indices. A short review of Geometry. Required.

**Natural Science.**

The Natural Science work of the Preparatory Department is performed thoroughly, but is adapted in amount and in method of presentation to preparatory students. These courses are offered for the year 1904-5 to those who have already begun the work of the Scientific course.

**Fourth Year.**

Physics. Fall and winter terms. Many experiments in which the pupils frequently assist are performed before the class. Required.

Elementary Chemistry. Spring term. This work is designed rather for pupils not intending to take the college course than as an introduction to that work. Required in Scientific course.
Geology. Fall term. The mineral and rock collection of the College is sufficient for present practical purposes in this work. Required in Scientific course.

Astronomy. Winter term. This is an elementary course in descriptive astronomy. The College has a three and one-half inch telescope. Required in Scientific course.

DEPARTMENT OF MUSIC.

Mrs. Read.

The course of instruction includes Organ Playing, Pianoforte and Harmony. Pupils who have made sufficient advancement are granted certificates when they leave the College, specifying the amount and quality of the work done.

Special attention is given to the needs of each individual in private instruction and in class work. Beginners take up simple melodies and their rhythmic relations; later, a study of their harmonic content. Those studying the pianoforte are expected to join the class in Harmony, in order to learn to express music by reading and writing it as well as by means of the pianoforte. The technical work of scales and finger exercises is given with special reference to their rhythmic relation. A knowledge of the harmonic content and form of music studied is an important element in this part of the work.

PIANO.

First Grade.

Musical rudiments. Development of technique, viz., a correct position of the hand, wrist and arm, with the proper method of striking or pressing the keys so as to produce a pure musical tone, as taught by modern German teachers.

Second Grade.

Third Grade.

Fourth Grade.

ORGAN.

A satisfactory knowledge of pianoforte technique is a prerequisite to the study of the organ.

The course consists of drill in organ technique, special exercises in playing church music, and careful study of works by the best composers, representing the different schools of organ music.

OFFICERS OF THE 
ALUMNI ASSOCIATIONS.

GENERAL
ALUMNI ASSOCIATION.

President
Leonard Herbert Stewart, M. D., '85, Kalamazoo.

Vice-President
Miner Cole Taft, '85, Kalamazoo.

Secretary-Treasurer
Mrs. Mary Hopkins Shillito, '93, Kalamazoo.

CHICAGO ASSOCIATION OF 
KALAMAZOO ALUMNI AND STUDENTS.

President
Walter H. Merritt, '85, 324 Dearborn St., Chicago.

Vice-President
Ainsworth W. Clark, 171 La Salle St., Chicago.

Secretary-Treasurer
Mrs. Isabella Bennett Kurtz, '96, 4711 Indiana Ave.,
Chicago.

LEGAL FORMS FOR 
DEEDS AND BEQUESTS.

A deed should be the same in form as a deed to any 
natural person, excepting that the correct name of the 
College should be inserted as the grantee. The name is 
"THE KALAMAZOO COLLEGE." For the sake of identifica-
tion, it would be well to make the name of the grantee in 
the deed as follows: "The Kalamazoo College, a corpora-
tion organized and existing under the laws of the State of 
Michigan, and located at the City of Kalamazoo, in said 
State, and the President of which at this time is Arthur 
Gaylord Slocum."

A bequest in a will would be legally correct if it read 
as follows: "I give, devise and bequeath unto The 
Kalamazoo College, a corporation organized under and by 
virtue of the laws of the State of Michigan and located at 
the City of Kalamazoo, in said State, being the same 
institution of which Arthur Gaylord Slocum is now Presi-
dent, the sum of . . . . . Dollars."

If it is desired to bequeath real estate or personal 
property other than money, the description of the real 
estate or of the personal property should be inserted in the 
place of the specific sum of money.

### Notes:
- Numeral indicate courses. a and b indicate sections of large classes. A and B indicate advanced and beginning classes.
- Subjects in the Preparatory Department in italics.
- No courses are offered for the first year of the Preparatory Department, excepting those in Latin, during the year 1904-5.
The Faculty desires to place a copy of this catalogue in the possession of every graduate and of students intending to enter college next fall. Alumni can help the College by sending addresses to the President or Secretary.
